Existing Structure	1 story; 2 bed/1 bath	Year Built	1941
Subject	Pursuant to Articles IV, V and VI of Appendix A Zoning, Sec. 400 Schedule of Regulations and Sec. 600. Site plan review and approval required. One story addition.		
Action Required	Approve, Approve with Conditions, or Deny the Application	Other Required Approvals	Village Building Permits MDDRER/EPRD
Staff Report	David A. Dacquisto, Director, Planning and Zoning	Report Date	May 5, 2016

Background

The subject property is an interior plot facing west.

The applicant is proposing to construct a one story addition at the rear and north of the residence.

The applicant is proposing to demolish a flat roof section of the residence and construct a 144 sf flat roof utility room on the same footprint. The flat roof addition is not visible from the street.

The applicant is also proposing to construct a 430 sf addition at the rear of the residence to extend the kitchen and enlarge a master bedroom suite.

The garage conversion and parking was approved in 1973.

Analysis

The rear addition will have a sloped roof matching the existing roof. The utility room will have a flat roof as on the existing room.

The proposed addition is compatible with the design of the residence, neighborhood and community.

The proposal is consistent with the technical provisions of the Zoning Code.

Recommendation

In acting on a site plan, the Planning Board must make a finding that the proposed improvements comply with the regulations and are harmonious with the community, as required in Articles IV, V and VI of Appendix A Zoning, Sec. 400 and Sec. 600, of the Code of Ordinances, and, in that regard, may add further conditions or delete or modify staff recommended conditions, deny the application, or continue the item for future consideration.

Planning and Zoning staff recommends APPROVAL of the site plan to construct a 144 sf flat roof utility room and a 430 sf addition to expand a master bedroom suite and kitchen, based on the foregoing analysis with a finding that it is consistent with the technical provisions of the Code except as noted and subject to the following conditions.

Should the board find that the applicant merits approval, staff recommends that the following conditions apply:

- 1) Approval is granted as shown on the plans submitted and made a part of this approval to construct a 144 sf flat roof utility room and a 430 sf addition to expand a master bedroom suite and kitchen.
- 2) Applicant to obtain all required building permits before beginning work.
- 3) An erosion and sedimentation plan subject to review and approval by the building official is required if ground cover is removed or as required by the building official. Properly installed soil erosion measures (silt fences, straw barriers, etc.) and anti-tracking area at all construction entrances are required to be put in place and maintained if ground cover is removed or as required by the building official. Required erosion control measures must be in place prior to footings inspection.
- 4) The site shall not drain onto neighboring properties or any rights-of-way. The plot shall provide storm drainage that detains the first one inch in natural or filtered structural facilities. The applicant is responsible for any site modifications that become necessary to maintain storm drainage on-site that detains the first one inch in natural or filtered structural facilities. The Building Official may require an architect or engineer's drainage plan and report to certify to the building official that the site will provide storm drainage that will detain the first one inch in natural or filtered structural facilities prior to the drainage work commencing on site. The installation of structures on site to control drainage shall require Planning and Zoning Board review and approval. Modifications to the drainage plan approved by the building official shall require a signed architect or engineer's drainage plan that shall be subject to review and approval of the Building Official and the Planning Director. Changes to drainage structures approved by the Planning and Zoning Board shall require a new site plan review application and review and approval by the Planning and Zoning Board. Applicant to obtain all required building permits before beginning work.
- 5) All drainage improvements shall be installed in accordance with the approved drainage plan before final inspection by the Building Official.
- 6) The applicant shall repair and maintain the onsite drainage system in accordance with the approved drainage plan.

- 7) Applicant to obtain all required permits and approvals from the Miami-Dade Department of Regulatory and Economic Resources, Environmental Plan Review Division (DRER, EPRD) and the Miami-Dade Department of Health (DOH/HRS) as required.
- 8) Applicant to meet all applicable code provisions at the time of permitting.
- 9) This zoning permit will lapse and become invalid unless the work for which it was approved is started within one (1) year of the signing of the development order by the board chair, or if the work authorized by it is suspended or abandoned for a period of at least one (1) year.
