

Miami Shores Village

Request for Proposal No. 2018-10-01

**“Disaster Recovery Management, Disaster Debris Monitoring and
Disaster Recovery Services”**

Amendment #1 – November 2, 2017

Question: Is the RFP to be used for the current work ongoing in response to Hurricane Irma or is this solely a pre-positioned contract for future disasters.

This RFP is for both Hurricane Irma and future events.

Clarification: With regards to Item A under Scope of Services – Debris Monitoring and Removal Services. The specific services noted under item A pertain to Debris Monitoring. For clarification, the Village is not asking for services that cover removal of debris. Please advise.

Correct. The services requested do NOT include removal of debris, only the monitoring and related activities associated with the pick-up and disposal of the debris.
